Results

一、表示不同组之间比较存在显著性差异的句型和句式

1、…is higher/lower/increase/decrease…in/by/with or after the administration of A than/compared with B；

2、Significantly increased/decreased…was observed in A compared with B。

3、Significant differences in…were observed/witnessed between A and B；

4、Enhanced/Decreased…in response to A/B was observed…；

5、A showed significant/better effect on …than/compared with B；

6、A significantly decreased/increase/improve …

二、表示不同组之间存在某种趋势，可以使用如下的句型或句式：

1、A similar trend was observed in…;

2、A compared toC additionally trended to…;

3、…tend to…in A compared with B；

4、A tendency towards higher/lower…was seen in…

三、用来表示组之间结果相似或者差异性不显著的句型和句式：

1、No impact of A/B/(A and B) on…was demonstrated in the presented experiment；

2、No effect on…occurred with or after the administration of A/B/(A and B)；

3、No difference in…was observed/witnessed between A and B；

4、There was no difference in…；

5、…in A and B did not differ；

6、…was not significantly altered by … treatment…；

7、…was simila in all (between) groups and ranged from …to…。

四、用来描述两个因素之间的不同相互关系的句型和句式：

（1）表示干预和时间效应

1、A treatment XXX period interaction/An interaction of treatment XX weeks was observed for…as…（描述指标随时间变化）；

2、There was an interaction of treatment XX time for…

（2）在描述结果时，可以尽量将两个相关的结果写在一句话中，用关联词链接，既可以使上下文衔接紧密，又可避免流水账式写法。

1、…in A and B did not differ, but … tended to be higher/lower with/in A/B；

2、…remained at a relatively low level, although a trend was observed for the increase/decrease in A/B in comparison with B/A；

3、A/B were not found to affect/have no effect on…, but tendency to…was observed in B/A；

4、Despite/Inspite of no effect on…, A/B significantly increased/improved…；

5、Similar tendencies, albeit not confirmed statistically/although not statistically significant, were observed in the remaining groups in which patients were…；

6、A negative effect of … on … and a positive effect on … were observed

（3）可以用来描述相关性分析的结果时用的句型和句式：

1、…is very negative significant correlated with …；

2、There is a significant negative correlation between…and…；

3、Rises in … paralleled increase in…；

4、… revealed a significant correlation with …；

5、There was an interaction between … and …

（4）可以用来描述生存分析结果的句型和句式：

1、Survival curves according to Kaplan-Meier showed: 1. Survival at … years is … %, with 95% CI between … and… ; 2. Survival estimate is … % at … years；

2、The overall …-, …- and …-year survival rates of … were … %, … % and … %, respectively;

3、The overall survival rates of … were calculated by the Kaplan-Meier,

with … %, … % and … % at …, … and … years, respectively；

4、The survivorship analysis (Kaplan-Meier) showed a … % survival of… after … years.

Results 中用来描述 Advantages / Disadvantage 的常用句型及句式：

1、One of the major advantages of this new measure of xx is that it can be applied to the experimental study of

2、One advantage of using a .. is the ease of preparing it.

3、The xx system is versatile

4、It has a very fast decision making process

5、All the algorithms involve mostly logical operations.

6、It can be easily and without additional cost implemented in a microprocessor-based environment.

7、It can reduce the waste of designing from scratch.

8、The advantages of using a xx to represent xx are the following:

9、However, XXX is not without its shortcomings.

10、In most cases, the XXX shows an improvement over the existing YYY.

11、Compared to the existing XXX, the impacts of the YYY are generally reduced by 5% to 9%.

12、The "best case" results shows a savings of 6% to 9%.

13、Most of the existing works based on XXX approach can only recognize a XXX .

14、Most of the above methods are computational expansive and limited to XXX.

15、Some other advantages of XXX are the following:

16、The problem is the limitation of this method to a limited domain of parts.

17、It proved limited in application because it demanded precision in system modeling that was impossible in practice.

18、There are advantages to be gained in the structuring of costs and benefits, the use of XXX,

19、The disadvantages of this method are also disadvantages of conventional XXX approaches.

20、This combines the best features of both techniques

21、Hopefully, this tool can be as the reference framework of for developing a XXX platform, and helping the administration, marketing, and knowledge management activities in virtual communities.

其他 Results 写作中常用的句型和句式：

1、An improvement on the result shown above can be made by based on the data provided

2、Based on the information contained in this

3、The result can be categorized into nine classes

4、The results are illustrated by an example

5、The experimental results for each XXX time are reported in Table 2.

6、From the results obtained so far, it seem that

7、Because of the inaccuracy of the ..., a conclusion cannot be drawn as

8、Although much effort has been made to., this reality is far from completion.

9、The results indicate that the total benefits are higher than the total costs.

10、Their results may then serve as guidelines for lower level models, less fuzzy and more detailed.
